

Intradyn Verizon Network Archiver

Seamlessly capture and archive SMS and MMS text messages

Direct Capture of text messages for automatic archiving from Verizon Mobile network

How it works

SMS and MMS messages are recorded directly from the Verizon mobile network for employees.

A copy of the message is stored in the Intradyn Archive or your email archive.

Authorized Executives/managers etc can search and monitor employee activity to assure business best practices.

Track Down Text Messages in Seconds

Intradyn's text message archiving solution features a granular search functionality with intuitive controls, making it easy to track down the exact message you need in a matter of seconds.

Our search even covers typos and misspellings using fuzzy logic, so you'll never have to worry about missing out on a key piece of information.

Benefits

Works for corporate-owned smartphones

Deposit SMS/MMS in Intradyn's archive or any email archive.

Search employees' mobile communication from an easy-to-use web interface, from anywhere!

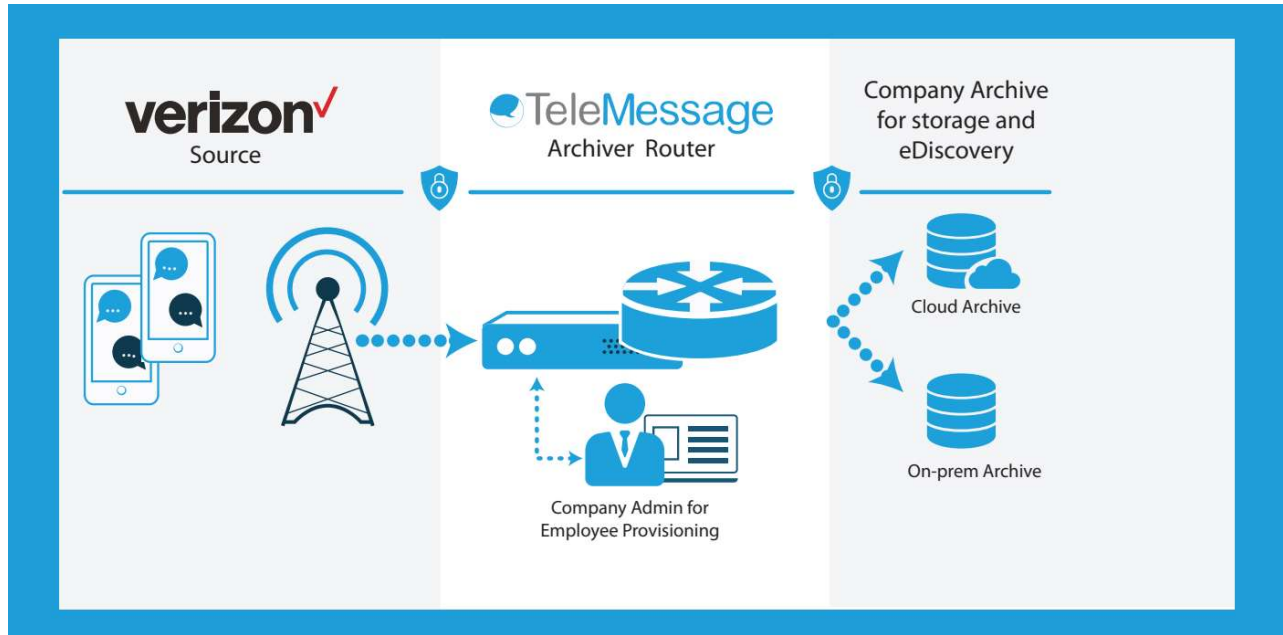

End-to-end encryption from Verizon network to archive.

Leave the Setup To Us

Our team of solution engineers will work with you to get configured and train you on how to use the archive and after you are setup, if you have any questions our support team is there to help.

Alternatively, if you are leveraging your existing email archive, we will get everything configured to deliver your archive and provide IP addresses to whitelist to ensure secure message flow.
